

How do I connect Wi-Fi Enabled Devices

Last Modified on 06/16/2021 4:41 pm EDT

1. Turn on the Wi-Fi feature on your device, and browse for available wireless networks.
 2. Find your wireless network name and select connect.
 3. Enter the security key or password for your network.
 4. Once your device has been successfully connected to your network, it will automatically connect to this network as long as the Wi-Fi is enabled on your device.
