

What is a channel lineup?

Last Modified on 11/27/2024 1:03 pm EST

A channel lineup is a list of all the channels and corresponding channel numbers provided by SECV. To view and/or print your channel lineup, please visit [SECV.com](https://www.secv.com) and select your system location. Click the "Channels" link at the top of the page for a PDF of your channel lineup. You will also be able to search for channels by name or number.

*Please note this list is a comprehensive listing of all channels provided by Service Electric Cablevision. Your ability to view a channel and/or tier is dependent on which TV service tier you subscribe.
