

How do I access TV Everywhere content via my mobile device or tablet?

Last Modified on 03/11/2017 1:07 pm EST

To watch content on your favorite devices you must download the corresponding app from the app store for your device. Please visit www.secv.com/tve for a list of supported devices by network. Upon accessing the app, you will be prompted to select your cable, provider (Service Electric Cablevision) from the "Select TV Provider" list. You then will be asked to verify your TV subscription, this often means entering the username/password corresponding to the online account.
