

Will I receive data usage alerts if I do not have an email address on file?

Last Modified on 06/18/2021 4:03 pm EDT

We encourage all customers to provide us with a valid email address for customer notification purposes. In the event you do not have an email address in our billing system, you will not be eligible to receive 75% and 90% usage alerts, however you may receive a notification via regular mail if your usage reaches 100% for the month.

You can also monitor your monthly data usage by visiting our [Usage Meter](#).
