What is Distinctive Ring?

Distinctive Ring allows you to have multiple phone numbers on your accountand know which number is being called based on the type of ring pattern. For example, you could have one for personal use and another for a home business. The ring pattern will let you know how to greet the caller. There are up to 7 ring patterns available for use. Please contact a Customer Service Representative (877.955.SECV) to setup the Distinctive Ring feature.
