

What is Priority Ring?

Last Modified on 12/15/2017 4:47 pm EST

Priority Ring allows you to know who is calling based on the ring pattern. Within your call screening settings in the SECV Web Portal (<http://secv.user>), you will be able to set the specific ring pattern for all anonymous callers, all toll-free callers, and/or a certain phone number(s). There are up to 7 ring patterns available for use.
