

What is the SmartBar?

Last Modified on 11/26/2024 3:20 pm EST

The SmartBar predicts shows to watch based on what your household usually watches at a particular time or day. For example, if you normally watch the previous night's late-night talk show the next morning, you'll see it in the SmartBar when you wake up. Use the DOWN arrow on your remote control to move to the Smartbar, then select a show to go to the Series or Movie screen, where you can choose to watch it.
