Last Modified on 11/26/2024 3:31 pm EST

Thuuz “excitement ratings” can tell you if a game is going to be worth watching before you start watching it. The scores are updated in real-time. This means, in a game that might be mediocre at first, you’ll see lower Thuuz scores. As the game gets more exciting, the score will go up. Games are rated from 0-100, with 100 being a great game.
