

Can I manage my Plume network remotely?

Last Modified on 04/08/2025 8:54 am EDT

Yes, using the Plume Home app makes it easy to manage your network at any time. As long as you have your phone, you'll be able to manage your network settings directly from the app. You will need a data connection on your mobile device to initially set up your Plume network. Once you are set up, you can manage your network over an Internet connection.
