What are the features of the Plume Home app?

Manage your network like a pro

As people and devices come and go in your house, Plume Home lets you see which devices are accessing the Internet and how much they're uploading or downloading. You can block and unblock specific devices from accessing the Internet.

Device usage and management

A tap on each device provides insights into the signal strength and bandwidth consumption. You can also see which Plume pod it's connected to.

Daily insights to fine-tune your set up

The Plume Hone app delivers daily reports on your home Wi-Fi signal strength and network activity. Get placement tips that help you fine-tune your wireless network based on the ways you're using it.

Magically simple to set up

Plug Plume in and let the system go to work. Plume recognizes all of your devices, identifies the flow of traffic, and starts to optimize your home network. The Plume Home app helps you manage the setup with a few quick taps.

Wi-Fi that knows the whole family

Who's playing games? Watching TV? Streaming music? With the ability to keep track of which devices are on your network and how people are using them, you'll always enjoy peace of mind at home.
