

What is Google Search?

Last Modified on 07/28/2021 10:58 am EDT

Search allows you to search by show title, episode title, show description, or person name (actor, director, etc). The TiVo service searches upcoming TV shows and movies, streaming videos (from sources like Netflix), and SECV On Demand all at the same time. You can even search the channel by their network name or call sign (e.g., NBC or ESPN).
