

# How does SECV's ACP program differ from other companies'?

Last Modified on 05/11/2022 2:39 pm EDT

SECV offers a \$30 dollar discount on any SECV Internet plan for those that qualify for the Affordable Connectivity Program (ACP). Our program is flexible and can be applied to any Internet tier or package with or without TV and Phone service. Therefore, we decided not to set restrictions forcing you to subscribe to a la carte Internet service with only one tier option as some companies are doing. This process allows you to select the speed you need and receive additional savings from the ACP program and product bundle savings. For more information, please visit [www.secv.com/acp](http://www.secv.com/acp).
