

How do I program the 9000L universal remote to work both my DTA and Television?

Last Modified on 03/21/2025 2:42 pm EDT

Step 1. First link the 9000L remote to your DTA. Press the CBL and OK/SELECT buttons at the same time and hold down for about 5 seconds until the red light on the remote stays lit.

Step 2. Enter 215 then hit the CBL again. The CBL button should blink twice.

Step 3: Now program the remote to your TV using the instructions located on our [support](#) page .
